Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Otsuka et al. (US 6,307,791 B1).

At least in figures 4-6, Otsuka et al. teaches a method or a circuit comprising:

an input/output cell (69/70 in Fig. 4; see 111 in Fig. 1 for example in detail) includes a first set of transistors (see 1Y, 2Y, 4Y, 8Y, 8Z, 4Z, 2Z, 1Z in Fig. 1 for example) ; a node (REFIU in Fig 6); a comparator (OP2 in Fig 6); means for adjusting (transistors N31, N32, N33 and P1, P3, P2 in Fig. 6) the voltage of the node, including means (OP1 in Fig. 6) for activating a number of resistance devices (P1, P3, P2); a digital generator (U/D Counter 224); means for transmitting (REGISTER 51 or DATA UPDATE CONTROLER 52 in Fig. 5) the digital signal to the input/output cell to adjust the input/output impedance; and a reference resistor (RQ Fig. 6).

As for the recitation, “a digital controller designed as a synthesized core or macro”, it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to

be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. Ex parte Masham, 2 USPQ2d 1647 (1987).

Response to Arguments

Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
